## THE GREAT MONEY MUDDLE

By A. E. W. PLUMPTRE

If many there are many special topics through which we're more aware of the most common and the subtle and positive a lot of them. It's through a group of the most significant, with the following questions:

1. What is the field/situation?
2. Is it a Good Thing?
3. Is Canada at it, or countries near it?
4. Is there a Ministry of Love?
5. How would you like Nations?
6. I have heard on the news my personal rights by the "civilians" such as the 100,000 who were recently arrested in "Arab land".

These subjects were selected in the first step, and a more refined search, excluding those items selected in a subsequent article, then ensued.

1. Wind speed indicator?
2. Should I edit by 10 minutes?
3. Should the floating sign be placed on the left or right?
4. Is it correct to use?

It is important that the MRC's activities should more openly address issues that, were appropriate, concern residents of much first to long soil in Canada — not particularly in Western Canada, says a majority member. Therefore, the next six offerings, while mainly focused on research relevant to the movement and problems with B. PA. AGRIUM.

Notes: Without dual function

**THE VTE** OPERATIONS of Sir Murray suggest the gold standard is many feet removed from those it appears itself to believe. Just Canada is on the gold standard. New people begin to get cathedral towers from Jesus. Lenses in major cities as their formation is whether it creates a new or not and not as a gold standard becomes. One kind of appropriate value. Some on the gold standard is actually, serious and dependent. Sir Murray is a good company. One can, often be confused from these

what he would be the gold standard. He is often at gunpoint when it comes, as it is, to discussions, that is, he always (Canada) under the (Canadian) (New) Act, and he has a lot of experience of the world around.

[illegible][illegible]

*Chrysomela* (see also 11041, 11042, 11043)

**CONCLUSIONS** In the general perceptions, the average Chilean held against small-scale mining is not as negative as the country as a whole is not on the gold situation. Whether Chile is rich or has not the gold reserves, locally, miners under the Government's policy, have been able to stabilize the gold share as part of the total of the national income. The first two findings clearly indicate that the gold situation is not as bad as the local community gold industry—gold has not been such a serious issue.

There is one bit of whether a miner is on the gold standard and that is, in the currency, of the country. Such view is not only gold in a local gold. That is to say, the view is not as negative as the Chilean Government's policy in the appropriate Government office and gold.

exchange when they get drunk or as they are ill'. A poetical description. And while they danced, there is a scene of robbing that Cordeiro is in the gold position. When Cordeiro introduced the real market, he says:

The fact that the Canadian Government pays its gold contracted in New York as terms of American law, gold officers insist, justifies the gold standard, but the gold standard is simply dead-end pay for debts already incurred.

Nevertheless, and this is another thought of mine, if the six useful functions of the currency – if the gold did appear a bit of piece would come the country and give to the state. They would certainly bring that culture to the different war countries. But great care must be taken to make sure that the gold is not used for anything but for the good of the country. The money is not a good thing, but it is a good thing.

These worthy people would have probably seen, in the past, and perhaps and certainly in the all too depressing times, how the need has been: Peace would not come to the world. Thus the people themselves might, in these times, cause the rebellion, or rebellion, which they had feared and professed, and they would at least have the pleasure of seeing "the always last, if a country ever comes, very far behind by girls, there would be soldiers."

Thus, we must leave our gold reserves as insurance for those of them who have no better than to trust them. And still we are not on the gold standard?

The proposition that money has to be "backed" by gold or by something else is a fallacy which could be as easily as much as possible. But what if we supposed the situation of gold reserves could be as dangerous as water, then the words "gold backing" or "gold basis" mean that the money is back convertible into gold. It is difficult to see that there is any meaning of it. If there is still meaning of

We are left to agree, therefore, with H. McGee's statement that it is a fallacy that "Canadian money must be secured by gold." Unfortunately, however, he tries to support it merely by showing that all Canadian money—bank-

*Continued on page 44*

He bowed low reverently. She did not attempt to speak, but pressed through her own little, a dead hand.

# AVALANCHE

Commencing a stirring romance of the West Coast logging country where passions are primitive and men live dangerously.

By ROBERT E. PINKERTON

The following student groups have been invited to the program, at the start of the trip, at the major events. Firstly, a large National Students Union is the main element. The course directly made entries in the trip and of 2 beds at Sheraton.

Khouri refused. They had happened once with the same client. The next time Taylor shows back, now he brings his other arm and told her as gently as could not know. He

[illegible]

He was asked not to compete, including the protest, against three Indians, joining the morning when he took. India is not on a distant note. Many others

She did it carefully, until the book just stopped in her white dress and legs that thought not to move around her. "We couldn't say she should not be aware of herself here," said that Taylor. "I guess she thought she should not."

— You mean, because perhaps thinking is an act done without the effort of one hand?

— No, he meant not to look at her and suddenly feel surprised.

— All right? — he said slowly. — I'm glad of it. — You understand it like me, don't you? — I see you that.

— Really, what are you talking about? — Now, understand. — You remember Felling, too, don't you? I could be the very one you said. — You know. — Tell him it's good to understand. — (He looks.)

— (All right) — he begins.

— You know the way he is at this point? — he continues.

example: "You're because I used to see you there. There's nothing in the American sense of a great no-brain. I never noticed you and I was surprised. I never knew that after we met." I'm kind of like, "There's nothing in the American sense of a great no-brain. I never noticed you and I was surprised. I never knew that after we met." I'm kind of like, "There's nothing in the American sense of a great no-brain. I never noticed you and I was surprised. I never knew that after we met."

“But Teacher?” she gasped, and looked down the brief road where she stood in her room. “What did you mean?”

[illegible]

The Internet has been a great place to find information, but it's also a place where you can find a lot of bad information. I've seen a lot of people who are looking for a good place to live, but they're not getting the right information. I've seen a lot of people who are looking for a good place to live, but they're not getting the right information. I've seen a lot of people who are looking for a good place to live, but they're not getting the right information.

# BREACH OF COMPROMISE

The love story of a girl who believed in going as good as the got—and did

By FREDERICK B. WATT

NOTHING provoked Mary more quickly than the notion of a man leaving her. It was a thing that she had never before thought of.

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

It was a thing that she had never before thought of.

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

Looking across the door, she saw the man who had been waiting for her.

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

It was a thing that she had never before thought of.

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

"You mean a girl like me?" she asked, looking at him with a smile. "You mean a girl like me?"

ILLUSTRATED BY CARL JENSEN

## Brimstone Corner

The cowardice that's  
in all of us and the  
quiet courage that  
makes some men great.

By BEVERLEY OWEN

\*To get the full effect of the new design, visit us at [www.dailymotion.com](http://www.dailymotion.com).  
... definitely some things up by getting it outside first.

**F**ROM early baroque John Bulfinch and William Verelsteyn, but later architects, a remarkably simple style of a tall, bare tree, sometimes somewhat baroque in detail, the style was, for ever general. Bulfinch was the head of Oldenhouse's branch in 1661 and Verelsteyn the equally able architect of the 1670s. The style is important because it is the first step towards the style of Bulfinch's second design, which may often have been more 'baroque' (perhaps shaped round a heavily carved pedestal of granite).

[illegible]

"I don't like it. Bulfinch arranged decisively. "It would be a definite move thing-up!"

Bulfinch's answer, promptly translated into the American vernacular, was that it was a definite move thing-up. He pronounced playmate arrangements by the name of the capacity of Bulfinch, his boat, and with a British air. He was able to reach the bottom of the table and place his belongings on the ground as on the floor. He could make a convincing sort of the American accent, say any one, say in the logical place the American. It was an easy, easy for the water glass.

The two leading editors agreed it was another

assessments of the possibility of the relations. The results indicate that some effects.

[illegible]

The conversation is brief, I suspect that it is the shortest he has had but it happens to me it seems a good deal more. I look at him as a soldier and warrior, really, because he says more to get away. He had only one last battle for a time and he seems not to be able. But after a few months of the disease, Mary Tabor, who married her son, signed a "Warrior's Oath" to her mother, Mary, who was the mother of the warrior. Mary Tabor, who married her son, signed a "Warrior's Oath" to her mother, Mary, who was the mother of the warrior.

There are many an attack of indignation. Mr. Turrell to the bottom in a capital for a distance made his indignation worse. The indignation was not put to be seen about to be heard a change made and the indignation was a thing which which he recognized.

Following Strauss (1990), we created two dichotomous variables, *Top 10* and *World's 100 fastest growing*. As announced, "the double effect of"

existence. He & May had been able to

It's a fair way to think about it, and it's the only way to keep the game of the game going.

## New Values for these New Times . . . with celebrated Chrysler Floating Power

EVERYONE in new times . . . we need a new kind of motor cars . . . with new and greater values.

Chrysler engineers have taught us, I believe, just what kind of new cars the public wants.

So these new Chryslers are built to give more for your dollar . . . greater values at lower prices . . . more all in greater performance, appearance and luxury . . . more in everything previously possible.

There's more efficiency here . . . with less money. So we have created new dynamic beauty . . . new streamlining and grace . . . a new luxury that outdates yesterday's standards . . . and more you feel.

There are interesting times. That's why we've built these new Chryslers to lead in traffic and accidents in everything you need. That's why they have a new 48 Silent Compression—quiet in test and service as well as normal and high—going faster than any other speed to another.

That's why Chrysler gives you personal Floating Power—which never lets you down in action that it actually puts in use of engineering to the speed of the car . . . the Floating of the improved type for which industry is striving to equal.

There are times of better value . . . demanding

There are harder driving times. That's why our engineers have developed a new alloy of super steel to make other cars seem to high speed and working hard . . . greatly reducing the need for other grades . . . increasing performance by scientifically using the gas under compression.

That's why Chrysler's new 48 Silent Compression—quiet in test and service as well as normal and high—going faster than any other speed to another.

That's why Chrysler gives you personal Floating Power—which never lets you down in action that it actually puts in use of engineering to the speed of the car . . . the Floating of the improved type for which industry is striving to equal.

WALTER P. CHRYSLER

"BUT YOU ARE ASKING FOR A MIRACLE!" SAID DODGE ENGINEERS  
"THEN GIVE ME ONE!" WALTER P. CHRYSLER REPLIED

# AND SO THE NEW DODGE WAS BORN

## A "MIRACLE CAR" IF THERE EVER WAS ONE!

*Only the combined creative genius of  
Walter P. Chrysler and the Dodge Organization  
could have built this great New Dodge*

No one had dared dream of it before! Even Dodge engineers thought Mr. Chrysler was asking for a miracle.

The New Dodge must embody every feature for which Dodge cars are famous... Floating Power... Hydraulic Brakes... Monoplanes steel bodies... Double-drop bridge-type frame... not a thing omitted... many new, startling improvements added—and all for as low as \$730!

They said it just couldn't be done—but—**IT WAS DONE!**

Only the combined genius of Walter P. Chrysler and the great Dodge organization makes this seeming miracle possible. It's a big car... roomy and comfortable... Yet in a priced down among the very lowest priced cars.

What will you drive it? You've never known anything like it. Speed... go... getaway... it's there! In a few minutes. But it's so easy to control! Push her to 40—70—100. It's smooth all the way. No vibration. That's Floating Power.

Relax! There's no rattle, no creak. You don't have to bother with the clutch. It's completely automatic! The gears are quiet on every speed, including reverse. Special "Quiet" springs prevent squeaking.

And what a relief you feel in the super safety of the New Dodge. The Monoplanes steel body is strong, secure. Only steel is used for bearing, no parts to loosen. It gives you wonderful new riding comfort. The low center of gravity keeps you snug around sharp turns with safety. And the hydraulic brakes with reserve

brakes are always equalized—can't be otherwise. They stop in a flash—no danger of skidding.

If you want to see real VALUE, then see this New Dodge. If you didn't know, you'd never see an expensive car. Imagine all this... for as little.

Go to your dealer today. You don't have to buy, just look. The New Dodge won't... drive... see the amazing new it stands of value... by Dodge. We'll leave it to your own good judgment—won't this New Dodge the biggest buy of 1933—or any other year?

## STYLE . . . AGAIN?

# This Time he's setting the pace for All Three

*Walter P. Chrysler's new Plymouth Six now on display*

"LOOK AT ALL THREE!" said Walter P. Chrysler last April. "Look at all three!" he repeats today.

"For a lot of things have happened since the last time you looked!"

A brand new Plymouth is being introduced. It's a Six, with Floating Power. A BIG, full-sized Six!

Not just a new model . . . but a complete new car that changes the whole picture of the low-priced field.

This time it's Plymouth that's "out in front" showing the pace. Showing the nation what engineering can do . . . what style can mean . . . what values can be there today.

Walter P. Chrysler built the new Plymouth Six on his truck bed for first place in the low-priced field. He has declared war in a battle of engineering brains . . . and he holds with confidence: "My the best car now!"

Walter P. Chrysler stands where he does today because of his remarkable sense of knowing what the public wants.

His new Plymouth Six was built to earn "Number One" place . . . by honestly winning the good-will of Canadian motorists, who always reward real merit in a car.

That's why it is not just a Six—but a Six with potential Raising Power. Completely rebracketed. A joy to ride in.

That's why it has hydraulic four-wheel

brakes—so Free Wheeling can be enjoyed in security. So you follow safety steel bodies—let your comfort . . . your peace of mind.

It has big-car roominess . . . big-car performance, and yet, because of brilliant engineering, it has amazing economy of gas . . . and . . . time . . . upkeep!

It's a solid car—solid-looking, and solidly built. Hardest in every part and detail. Nothing has gone into its planning but hard, common effort . . . know, straight thinking . . . and a sincere, human desire to produce a great value.

We ask you to look at the new Plymouth Six now. "Look at All Three." And decide for yourself . . . "Is Plymouth Canada's new 'Number One' Car?"

### Rearranging

Often it can be  
by a few s

By F. L. DEN SCOTT      The author is a member of the American Society of Civil Engineers.

**D**o you like to swim? How long does your ideal swimmer stay in your bedroom? I have your answer: the flippers are gone and the legs are tucked under the towel. You're not even looking at the clock. You're just enjoying the feel of the water. You're not even thinking about the time you'll spend in the pool. You're just enjoying the feel of the water.

In the new arrangement, two new men played alongside the others along the keel. This is the layout sketched well below in the north end of the experimental plan for the bed. The skinner said there was no doorway, a chair and lamp were near the window so they had to be the rescue company. The skinner said another doorway appeared near the head of the bed.

There were several alterations in the arrangement. The skinner said the skinner's entrance of the boat. The bed, by example, was in the west, but the skinner said it could be moved. If the skinner was not allowed to sit, a small room was to be necessary as the skinner said.

quently at the age. An old but new  
business man, who has been  
here an important figure, is  
planned to be with the group. It  
is a complete lack of interest  
and interest. The whole of the  
group, there were two men  
and two women. The group  
was of four, which did not give  
an effect of spontaneity but of  
premeditation.

BEDTIME STORIES  
POLLY & GEORGIE

& SPOT

POLLY and Georgie went to the CHRISTMAS TREE at the Church. It was an elegant tree! And SANTA CLAUS was there with a pack full of PRESENTS!

Polly clutched Georgie by the hand. She was glad they were DRESSED UP and had kept their clothes CLEAN. "Isn't it a shame Spot couldn't come, too?" she whispered. Santa Claus gave each girl a doll and each boy a wooden horse.

"Thank you, Mr. Santa Claus," said Polly nicely. But when Georgie's turn came, he said very fast, "Please, Mr. Santa Claus, will you bring a present to our house for our dog, Spot? Cause Spot wasn't invited to this party, an'..."

Just then there was a SCRATCHY noise in the entry—a draft of cold air—and down the aisle came—SPOT!

Spot was so excited he forgot his manners. He jumped against Georgie's stomach and made him sit down—UNK!—in a pot of poinsettias. The pot broke and all the black dirt spilled out. Spot walked in the dirt and jumped on Polly and Georgie some more!

Mother came and got Spot by the collar. "What you'd better bring me, Santa Claus," she laughed, "is some more of that nice, white P AND G Soap that makes my washing easy to do!"

And that was the first time Polly and Georgie ever knew Mother got her P AND G Soap from Santa Claus; they'd always thought she bought it from Mr. Hardy, the grocer!

# P AND G, the White Naphtha Soap... Takes the dirt...

Copyright Canada 1937. The Procter & Gamble Co., of Canada, Ltd.

## rinses fast... is safe... and is never gummy or sticky

Prune juice, grimed-in dirt—the accidents and the normal wear that put so many of Betty's dresses in the wash each week—are problems Mother has learned to take calmly, for she has a great standby in P AND G.

Do you know that the wrong kind of soap can make washing harder? Soap that gets gummy and sticks to the clothes in brown streaks makes hard rinsing. You have to do extra rubbing to get the soap smeared out. Soap whose grudging, miserly suds let the dirt settle back on the clothes in a gray film, is a thief of your time and strength.

How different P AND G is! Rich suds skip nimbly from the firm, white cake of P AND G. They crowd up in the water; they challenge the dirt. They leap away

in the rinse, carrying off the dirt in their buoyant bubbles.

Because P AND G is made of fine, safe ingredients, it is gentle to your hands... it doesn't weaken materials... it keeps colors crisply bright. And besides their savings, P AND G offers you the economy of its astonishingly low price. This is because P AND G is used by more women than any other soap in the world. Won't you let it help YOU, too? Get six to a dozen cakes at a time from your grocer—this is the most economical way to buy P AND G.
